## PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech student specializing in Artificial Intelligence and Data Science, with hands-on experience in backend development, data analytics, and AI-powered applications. Skilled in Python, Java, SQL, FastAPI, Flask, Django, and Spring Boot, with experience building REST APIs, data-driven applications, and role-based web platforms. Passionate about solving real-world problems through scalable software solutions, data analysis, and efficient backend systems, with strong analytical and problem-solving skills.

---

## TECHNICAL SKILLS

- **Programming & Tools:** Java, Python, SQL
- **Frontend Technologies:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend Technologies:** FastAPI, Flask, Django, Spring Boot
- **Databases & reporting:** MySQL, SQLite, ChromaDB, Excel, Power BI
- **AI & Data Technologies:** Pandas, Scikit-learn, Data Visualization, RAG, GraphRAG
- **Soft Skills:** Communication, Mentoring, Leadership, Team Collaboration & Teamwork, Analytical Thinking, Problem-Solving

---

## PROJECTS

### Smart School Communication Portal

- Developed a role-based school management portal for handling notices, attendance, meetings, and parent-teacher communication.
- Implemented secure REST APIs, JWT authentication, notice approval workflows, and attendance management using Spring Boot and MySQL.
- Designed dashboards for Admin, Principal, Teacher, and Parent modules with role-based authorization and analytics features.
- Built structured backend architecture using Controllers, Services, Repositories, JPA entities, and Hibernate integration.

### SmartHire – AI-Powered Campus Recruitment Platform

- Implemented AI-based resume analysis, ATS scoring, job recommendation engine, and candidate ranking using TF-IDF and cosine similarity.
- Built secure authentication workflows, analytics dashboards, REST APIs, and company verification systems using Django and Django REST Framework.
- Designed scalable database relationships and workflow management for job applications, interviews, and notifications.

### SKCT GraphRAG Chatbot – Website-Based AI Retrieval System

- Developed an AI-powered GraphRAG chatbot capable of answering queries using real-time website content from the SKCT website.
- Implemented website scraping, entity extraction, graph relationships, and context-aware response generation.
- Built modular FastAPI backend services for chunking, semantic retrieval, graph building, and AI orchestration using Ollama.
- Improved contextual understanding and grounded responses by upgrading from traditional RAG to GraphRAG architecture.

### DocuSherlock AI – Multi-User RAG PDF Assistant

- Developed a production-style Retrieval-Augmented Generation (RAG) application for intelligent PDF-based question answering.
- Implemented semantic search, document chunking, citation-based retrieval, and contextual AI responses using ChromaDB and Ollama.
- Built a multi-user architecture with FastAPI backend, React frontend, JWT authentication, and SQLite database integration.
- Designed hybrid retrieval pipelines with embedding generation, reranking, and persistent chat history management.

---

## WORK EXPERIENCE

### Web Design Intern – Adventure Technology Solution Pvt. Ltd. | 2025

- Designed and developed responsive web interfaces using HTML, CSS, and basic JavaScript.
- Collaborated with designers to implement clean UI/UX elements for internal web apps.
- Learned version control, layout optimization, and cross-browser testing practices.
- Gained hands-on experience with modern web design standards in a collaborative environment.

## **Python with AI – Dot Com Infoway | 2026**

- Developed AI-powered and full-stack applications including RAG systems, GraphRAG chatbots, recruitment platforms, and workflow management systems.
- Built backend APIs, semantic retrieval pipelines, role-based platforms, and intelligent data-driven applications using FastAPI, Django, Flask, and Spring Boot.
- Worked on document retrieval systems, AI orchestration, database management, authentication workflows, and responsive frontend integration.
- Collaborated on real-world project development involving React, MySQL, SQLite, ChromaDB, Ollama, and REST API architectures.

---

## **EDUCATION**

**B. Tech in Artificial Intelligence And Data Science | Sri Krishna College Of Technology, Coimbatore | 2026 – (Present)**

---

## **ACHIEVEMENTS**

- Secured Elite + Gold certification in NPTEL Programming in Java with a score of 90%.
- Achieved Runner-Up (2nd Place) in “Prompt Verse” at NEXERA National Level Technical Symposium.
- Participated in CDW STEP Student Program – Data Engineering Workshop focused on data engineering concepts and industry practices.

---

## **CERTIFICATIONS**

- **Introduction to AI | IBM | 2024**
- **Python for Data Science | 2024**
- **SQL for Beginners | Querying Data | 2024**
- **AWS Cloud Practitioner Essentials Data Science Basics – AWS | 2025**
